To expand our team we are looking for:

Engineer with focus on machine and plant design in the development and mass production of inkjet printing systems (m / f / d)

We seek applicants who want to bring their know-how, commitment and personality to a growing and dynamic company. The scope for these highly interesting work environment is centered around appropriate freedom, a team-oriented approach and the fascination of an innovative and flexible company.

Responsibilities:

- Development and planning of partially complex digital printing machines as a teammate in interdisciplinary agile teams
- Autonomous creation of single component and assembly drawings, parts lists and production documents considering the relevant directives and standards.
- Construction of turned and milled parts, as well as sheet metal and extruded profiles.
- Participation in the development of a high-precision and sophisticated machine from planning to realization.
- Integration of electrical, electronic and pneumatic components
- Compile the device and part specifications
- Detailed technical clarification with suppliers in planning, quoting and complaints
- Participation in engineering of standardized modules for serial production.

We offer you:

- A varied, practice-oriented and demanding full-time job with permanent employment.
- The opportunity to incorporate your ideas into a dynamic team and quickly take on responsibility.
- Regulated working hours, as well as cooperative work in a growing project team with a friendly working atmosphere (company language "you").
- The chance to learn and work with the latest technologies.
- An environment in which each individual counts and contributes significantly to the success of the company.
- Training opportunities: Your personal development is very important to us.
- Flexible working hours: With overtime account for your personal compensation.
- Physical well-being: coffee, tea and mineral water as much as you want.
- Joint events: BBQ for lunch, after-work beer in the beer garden, go karting - team building is important to us.
- Family & Friends: We enjoy working and we can share this friends and families.
- Financial Benefits: We offer you performance benefits.
